USE OF ICT FOR TEACHING LEARNING PROCESS

We develop adequate skills among student-teachers for effective use of ICT through following activities:

1. Our student-teachers prepare various types of lesson plans in different workshops such as Micro Teaching, Lesson Planning, Simulation and Constructivist workshops through the use of ICT. They prepare video recordings of their own practice lessons for the self-observation and improvement in their teaching skills.
2. For the preparation of lesson plans student-teachers search information and videos related to their practice lesson content through websites.
3. Student-teachers develop online MCQ test using google form for the online assessment of learning and they also develop unit test for offline assessment using MS word. They prepare mark lists through Excel sheet.
4. All teacher educators upload various types of learning materials in the form of text, PPT, audio, video and related links of websites, tests, etc. Student teachers have been suggested and motivated to use various YouTube videos for their learning and accordingly our student-teachers use.
5. Our teacher-educators communicate through WhatsApp with student-teachers.
6. In Semester IV under the Practical EPC3- Critical Understanding of ICT student-teachers learn information browsing through websites, prepare mark list using excel sheet and document file using MS word, PPT, online test by using google forms, Creating and managing e-mails, etc.
